
ER DYR "NOGET" ELLER "NOGEN"?

- OM KONSEKVENSER OG PERSPEKTIVER I OMTALE OG SKILDRING AF DYR

Det Dyreetiske Råds konference om Dyreværnsloven

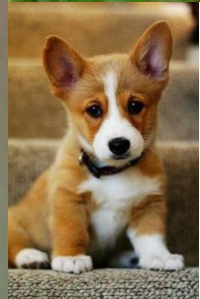

Theophanes of Kreta (c.1490-1559), *Adam navngiver dyrene*

- Hvad er et "dyr"?

- "den", "det" eller "han", "hun"?

- Særlige dyreord: "parring", "drægtig" etc.

Kæmpe-måger invaderer
Festugen**

**Måger giver flere og flere
klager**

”Det er rigtigt, at et navn er med til at menneskeliggøre et dyr. Og med chimpanserne er det en tradition, som er svær at komme til livs. Det erkender jeg blankt. Egentlig burde vi give dem et nummer eller en benævnelse ... [i] respekt for dem, men også for at fortælle den rigtige og sande historie til publikum.”

Bengt Holst i *Ud og Se*, november 2003

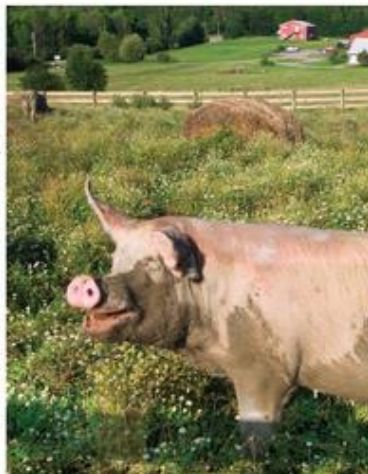

SIGNS OF INTELLIGENT LIFE

Pigs possess complex ethological traits similar to dogs and chimpanzees.

By Christina M. Colvin and Lori Marino

If you visit Nikki, one of the famous pigs who lives at Farm Sanctuary's 175-acre shelter in Watkins Glen, New York, you can expect her loud voice to announce your arrival. Nikki is gregarious and quick to associate with human visitors. Don't take it personally, however, if she keeps you at bay from her babies. She has good reason to be wary of strangers. Prior to her rescue, Nikki escaped from a gestation crate during the record-breaking flood of the Colar River in Colar Rapids, Iowa in June, 2008. Shortly thereafter, Nikki gave birth to a litter of piglets. Dejected and alone, Nikki protected and named her newborn despite her stress, exhaustion, and hunger. Now, years after that traumatic experience, Nikki continues to be inseparable from her offspring.

Rose, another mother pig, also escaped from a gestation crate during the Iowa flood. Unlike Nikki, however, Rose suffered the loss of her children. After her relocation to the Watkins Glen shelter, Rose exhibited signs of depression. She refused to eat. She ignored her 60-day piglets' attempts to cheer her with invitations to play. Shelter workers had to feed her with a syringe. Observing that Rose was showing interest in Nikki's interaction with her farm litter, workers moved Rose into a pen with

”Grise er intelligente, følende væsner. Derfor skal vi behandle dem med respekt.”

The New York Times

“evidence is mounting that [chickens are] smarter than we have assumed, and just because they don't have big brown eyes doesn't mean that they should be condemned to spend their lives jammed into tiny cages in stinking, fetid barns”

Nicholas Kristof, *New York Times*
